Recently, several efforts have been made to develop the deep learning (DL) algorithms for automatic detection and segmentation of brain metastases (BM). In this study, we developed an advanced DL model to BM detection and segmentation, especially for small-volume BM. From the institutional cancer registry, contrast-enhanced magnetic resonance images of 65 patients and 603 BM were collected to ...

By analyzing and comparing different experimental approaches, we estimated SOC FE, POC FE, and MAOC FE of aboveground inputs, roots, and rhizodeposition separately using data from 35 studies and 197 observations that applied  $^{13}\text{C}$  as a tracer of plant inputs into the soil (). On the one hand, we compiled "litter incubation experiments" where roots and aboveground inputs were added to the ...
