The firing order for a stock 6.6-liter Duramax diesel is 1-2-7-8-4-5-6-3. If the engine is left completely stock, there isn't much of a problem with this firing order. However, the crankshaft on the 6.6-liter Duramax is known for being on the weaker side. Many diesel owners tweak their engines for more power, which affects engine harmonics ...

Which GM vehicles are affected? At first glance it seems that any vehicle with a 3.0-liter Duramax diesel — including the Silverado, Sierra, Suburban, Tahoe, Yukon and Escalade — can have issues with long crank start times or no start. And that means light-duty trucks and SUVs GM has made in the last three years — specifically 2019, 2020 and 2021.

3.0L Duramax diesel has known long crank start issues, but no recall

I have a similar problem. I own a 2016 Chevy Suburban LTZ (with 21,000 km). The MyLink screen has gone wacko! Shortly after engine startup the icons on the screen become erratic, moving around on the screen. If in radio mode, the radio channels change erratically, sometimes changing bands too.

Possible cause of 2016 infotainment screen going black | Chevy and GMC ...

If your diesel engine cranks but won't start, you've come to the right place. "The PMD / FSD (Pump mounted driver) is by far the #1 cause of 6.5L no-starts (at least 90%)." If your truck experienced random stalling like someone shut the key off before ultimately refusing to start again, the PMD is very likely the issue.
