Master Data Management (MDM) and Data Governance are great partners. Even though the MDM can be a great driver for data governance (and there are a few others – read/watch more here), a successful MDM implementation cannot be achieved without data governance.

7 data governance deliverables for MDM | LightsOnData

It is not two efforts but just one that has significant benefits and value to the organization. Yes, MDM is more than data governance and data governance is more than MDM. But the MDM program should be considered as an implementation of both practices. And as always, stay calm and allow your data governance program to prosper.

MDM Needs Data Governance - Here's the Reason Why | Collibra

Master Data Management includes processes from the creation of master data thru to its disposal. Data Governance creates the rules and adjudication of the operational processes that are executed within those processes. Therefore, Data Governance does not sit as a separate process.
