Centrality in Social Networks Conceptual Clarification

Note that Herzberg's theory has often been labeled the "two-factor theory" because it focuses on two continua. This name, however, implies that only two factors are involved, which is not correct. Herzberg prefers not to use the term "two-factor theory" because his two sets of needs identify a much larger number of needs.

The outbreak of Covid-19 had negative impacts on the mental stress and induced psychological distress among university students worldwide. This study proposed a moderated mediation model, and hypothesized that the Covid-19 pandemic-related stress was positively related to depressive symptoms among international medical students. An online survey on stress and depressive symptoms of ...

The purpose of this chapter is to review what is known or suspected about the causes of depression. Fundamentally, such depressive symptoms as sad mood, pessimism, and lethargy, are universal human experiences and are considered normal reactions to the struggles, disappointments, and losses of everyday life. However, for some individuals, the intensity and persistence of depressive symptoms ...
