The Chinese Medicinal Herb Farm

In general use, herbs are a widely distributed and widespread group of plants, excluding vegetables and other plants consumed for macronutrients, with savory or aromatic properties that are used for flavoring and garnishing food, for medicinal purposes, or for fragrances. Culinary use typically distinguishes herbs from spices. Herbs generally refers to the leafy green or flowering parts of a ...

Herb - Wikipedia

Medicinal plants, also called medicinal herbs, have been discovered and used in traditional medicine practices since prehistoric times. Plants synthesise hundreds of chemical compounds for functions including defence against insects, fungi, diseases, and herbivorous mammals.Numerous phytochemicals with potential or established biological activity have been identified.

Medicinal plants - Wikipedia

Herbs have many different effects, some herbs are warming and some are cooling by nature. Many traditional healing systems such as Chinese medicine and Ayurvedic medicine value the energetics of herbs and their effects on our bodies. We can use these herbs throughout the summer months to keep our cool.
